Satapathy followed by the speech of the 'Guest of Honour'- Shri Mathura Prasad Mahato, MLA, Ex-Minister of Jharkhand.

It is worth noting that during his keynote address, Prof. H. K. Satapathy mentioned that “...the entire process of the Indian tradition of teaching was successful and fruitful because of Sanskritization and the same movement of Sanskritization is the need of the hour for reshaping and redesigning the present Indian system of Education towards projecting India as “Vishva Guru” and reviving its glorious tradition.”

During one of the important sessions, Prof. Om Prakash Pandey, a NASA Scientist and an eminent Sanskrit scholar talked about several scientific research including the formation of Universe, the Big Bang Theory, Solar Family, Matter, Particles and the studies carried out by NASA etc. and referred to many instances which were already stated in Vedic texts some thousands of years ago viz. Rig Veda, Khatopanishad. He emphasized that these Mantras in our Vedas ascertain the theories of present-day science. He also mentioned that in 1964 NASA in its research found out that Sanskrit is the only medium of language transmission from one Solar System to another

as the echo produced by Sound Wave in the Solar System were syllables of Sanskrit, he added. Expressing his concern he sought all the Vedic Scholars to focus now on how to take forward Vedic Sciences in a better way across the world and bring back our past glory.
