## Valuation Principles

- 1. Values **INDEPENDENT** assets more, based on market as an amount of cash or cash equivalents paid or payable by investors.
- 2. Prices on **ASSETS** are based on the amount that would be paid for assets in an orderly market.
- 3. Also known as **MARKET VALUE**, Assets are valued at the amount that would normally be received by selling the assets in an orderly market.
- 4. Values with **INHERENT** value are based on the present discounted value of the future net cash flows that they are expected to generate in the normal course of business.
